Added value

Modular construction

- Pre-planned or individually designable routing
- Interior fittings with system profiles that allow the course to be converted at any time

Crawling course

- 32 m long crawling course extending over two levels
- Modular design with aluminium system profiles
- Flexible conversion and expansion possibilities
- Several rescue openings to quickly evacuate participants in case of emergency
- Can be complemented with cardio equipment, light, sound etc. at any time

Openings

- Hatches in the roof for access to the container from above
- Exercise doors and windows for practising forced access by means of a breaking tool

Practice wall

- To practice the correct use of ladders
- To learn different window opening and window entry scenarios

Easy to transport

- Thanks to its mobile solution as a container, the system can be transported quickly and cost-effectively
