Facts

- Can be used as storage for various rescue stretchers: emergency stretcher, sighting storage, shock storage (approx. 30°), leaning ladder, table or bench
- 8 sturdy, automatically locking steel hinges for quick and secure assembly without tools
- Folds up compactly to approx. 115 × 50 × 20 cm - ideal for transport and storage
- Lightweight design with a total weight of only approx. 11 kg - ideal for mobile use
- Powder coating in RAL 1016 for high visibility in poor lighting conditions
- Robust aluminium frame with a maximum load capacity of 150 kg - tested for professional use
- Versatile use - replaces several individual devices and saves space in the vehicle

Description

Every second counts in an emergency. When human lives are at risk, every action must be precise and every piece of equipment must function reliably. This rescue stretcher storage system was developed precisely for this purpose: as a robust, flexible and efficient companion for fire brigades, technical relief organisations, the military and disaster control, especially in large-scale emergencies, mass casualty incidents or unclear situations.

Maximum operational readiness with minimum effort: weighing only approx. 11 kg and setting up in seconds without any tools, the frame can be used immediately wherever quick action is required. Eight automatically locking steel hinges ensure a secure footing in any situation, even in tents, halls or on uneven terrain.

- Developed for use by fire brigades, rescue services, disaster control, THW and the military

One device, many functions: triage bed, shock position (approx. 30°), leaning ladder, table or bench – this system replaces several individual devices. This not only saves space in vehicles and containers, but also significantly reduces acquisition and storage costs. Particularly valuable when situations change quickly and flexibility is required.

Compact when stored, large in use: folded up, it measures only 115 × 50 × 20 cm – ideal for mobile use where no resources can be wasted. Whether in a vehicle, tent or at the scene of an emergency, this solution works even when there is no clear structure in place.

Tested for professional use with a load capacity of 150 kg and developed for emergency services who have to work under pressure.

Safety. Made in Germany. For people who bear responsibility.

Scope of supply

- rescue stretcher storage: 1 x

Information on sustainability criteria

- Corporate certification: ISO 9001
- Corporate certification: ISO 14001
- Corporate certification: EN 1090
- Corporate certification: EcoVadis
- RoHS
- REACH
- The MUNK Group complies with a Code of Conduct
- The Supply Chain Act does not apply due to our size
- The materials used are listed in the technical specification

- Resource-saving production: own photovoltaic systems
- Energy-efficient consumption during production: LED lighting
- Repairability, durability and quality: 15-year warranty on series products made in Germany
- Recyclability: Our products are mostly made of aluminium, steel or wood and can be fed directly into the recycling process.
- Socially acceptable working conditions in production: fair wages, gender equality
- Economical and recyclable packaging: no use of polystyrene, predominantly use of wood and cardboard, small amounts of plastic
- No health hazards for the users
