Description

Flat mounting bracket for space-saving profile connections! The MUNK mounting bracket made of galvanised steel creates stable 90° connections – without machining and with minimal space requirements.

Space-saving & robust design

- Flat design: Only 4 mm (30×30) or 5 mm (40×40) material thickness for minimal space requirements between profiles
- Galvanised steel: corrosion protection for continuous use in industrial and outdoor applications

We reserve the right to make technical changes and price changes.

- Weight-optimised: 46 g (30×30) or 100 g (40×40) – lighter than die-cast corner brackets

Universally applicable without machining

Suitable for all MUNK construction profiles with 6 mm T-slots (30 mm profiles) or 8 mm T-slots (40 mm profiles). No machining required – insert the slot nuts, attach the angle bracket, screw it in place.

Versatile connection options

- Profile connections: Stable frame corners for machine frames and enclosures
- Component assembly: Fastening of panels, sheets or accessories
- Bracing: Retrofitting of existing constructions

Typical areas of application

- Machine frames: Space-saving corner connections in confined spaces
- Protective & test enclosures: Flat assembly without annoying protrusions
  Assembly tables: Fastening of worktops or side components
- Transport frames: Lightweight bracing for mobile constructions

Discover the MUNK mounting bracket – the slim alternative for profile connections that saves space today and can be flexibly expanded tomorrow.
