Folding handle with spring

Specification

Material Galvanised steel	Weight/piece 50 g	Dimension A 116.5 mm	Dimension B 88 mm	Dimension C 12.5 mm
Business division MUNK Profiltechnik	Order no. 930607			

Facts

- Self-rebounding
- Sturdy design
- Slim structure
- Load bearing capacity: 70 kg

Description

Self-returning transport handle with 70 kg load capacity! The MUNK Profiltechnik spring-loaded folding handle combines powerful carrying strength with a space-saving design – automatically folding back after use to maximise space efficiency during heavy-duty transport tasks.

Automatic Return for Ergonomic Comfort

- Self-returning: Integrated spring ensures automatic return to the space-saving resting position after release
- High load capacity: 70 kg rated for transporting heavy goods and equipment

- Slim design: Only 12.5 mm installation height with robust construction for minimal space usage

Durable Construction for Continuous Use

Galvanised steel: Corrosion-resistant steel construction for long-lasting performance in industrial and outdoor environments. Compact dimensions: 116.5×88×12.5 mm with just 50 g weight – perfect for frequently used transport solutions.

Ergonomic Use Without Obstruction

The spring mechanism prevents permanent protrusion from the housing and allows ergonomic gripping only when needed – ideal for trolleys, mobile frames, or service hatches that should remain flush in everyday use.

Typical Applications

- Transport trolleys: Ergonomic grips for tugger train systems and order picking carts
- Machine frames: Transport handles for mobile test benches and equipment
- Service hatches: Space-saving handles on maintenance and access panels
- Workstations: Portable assembly tables and mobile workbenches

Discover the MUNK spring-loaded folding handle – the powerful transport solution that carries heavy loads today and automatically saves space when not in use.

Scope of supply

- Folding handle: 1 x
