Facts

- Take advantage of our cutting service. We will cut your profile to the desired length quickly and easily.
- Cutting profiles to size
- Clean cut
- Perfect preparation for assembly
- Saves transport costs
- Dimension: max. 6000 mm

Description

Precise cutting instead of chip loss! The MUNK Group's cutting service delivers your aluminium profiles ready for installation in lengths of up to 6 m, thereby reducing processing and logistics costs.

Cleanly cut, ready for immediate use

- Precise sawing produces exact cut edges.
- Desired lengths up to 6,000 mm for all profile cross-sections in the MUNK series.
- Precise dimensional tolerances facilitate screwing, grooving or welding.

Efficiency from order to installation

- Profiles arrive at your production facility ready for installation – no internal sawing processes are required.
- Shorter transport pieces reduce freight costs and packaging material.
- Fast delivery minimises stock levels and speeds up project start-ups.

Typical areas of application

- Prototype construction: Precisely fitting lengths shorten development cycles.
- Series production: Eliminating internal cutting reduces unit costs.
- Construction site assembly: Handy profiles facilitate transport and handling.
- Retrofit projects: Precise replacement parts enable rapid plant modernisation.

Take advantage of the MUNK cutting service – the fast shortcut from raw profile to ready-to-install component.

Information on sustainability criteria

- Corporate certification: ISO 9001
- Corporate certification: ISO 14001
- Corporate certification: EN 1090
- Corporate certification: EcoVadis
- RoHS
- REACH
- The MUNK Group complies with a Code of Conduct
- The Supply Chain Act does not apply due to our size
- The materials used are listed in the technical specification
- Resource-saving production: own photovoltaic systems
- Energy-efficient consumption during production: LED lighting
- Repairability, durability and quality: 15-year warranty on series products made in Germany
- Recyclability: Our products are mostly made of aluminium, steel or wood and can be fed directly into the recycling process.
- Socially acceptable working conditions in production: fair wages, gender equality
- Economical and recyclable packaging: no use of polystyrene, predominantly use of wood and cardboard, small amounts of plastic
- No health hazards for the users
