Added value

Rational modular principle

- Shaft ladders in two widths and various lengths offer the right solution for every project
- Ideal for sewage treatment plants, landfills, retention basins, pump shafts, etc.
- Each individual component in the modular kit system meets the same quality and efficiency requirements
- Use of fall protection with wide design possible

Various material versions

- Depending on the application, shaft ladders made of steel, stainless steel and reinforced fibre glass are available
- Wall anchors and accessories are also available in several materials

Mounting and fastening

- Quick and easy installation of the shaft ladders thanks to the optimised installation system
- Adjustable wall anchors for complex projects additionally facilitate installation
- Suitable accessories available for the different material versions

Entry aids

- Different variants in accordance with DIN standards and German Social Accident Insurance (DGUV) regulations for safe entry and exit
- Available in various materials to match the ladders

Highest quality

- Stable rectangular tube side-rails
- High-strength rung-to-side-rail connection
- Non-slip perforated rungs

Fiberglass

Ladders made of GFRP offer the perfect properties for special challenges. Find out what makes GFRP such a special material, how we use it for ladders and where these ladders are used.
