### Facts

- The mobile safety system
- Transport solution in anodised aluminium
- For individual and customised fitting

### Description

Are you looking for an outstanding safety system that optimises preventive fire protection? Then the SafeCaddy® "Mobile Fire Alarm System" is the answer to your needs! With its transportable and

- Optimised for preventive fire protection with the help of a mobile fire alarm system
- Eye-catching design for easy recognition as a rescue tool
- The innovative advantage in every security concept
- Large mesh basket for directly accessible aids
- 1 large material box for transporting a mobile fire alarm system
- incl. aluminium box for individual equipment
- Comfortable, rubberised push handle
- Puncture-proof wide wheels made of PU, roller bearings (not blocked even after long periods of standing and always ready for use)
- 4 support feet for stable stand and pressure relief of the wheels
- Integrated lashing points for safe transport
- Simple and ergonomic operation by one person
- Fabric reinforced cover as accessory

effective equipment, it represents the innovative plus in every safety concept.

Our SafeCaddy® is not just a simple transport trolley, but a powerful safety tool that allows you to always have directly accessible tools at hand. With a generous mesh basket, we offer you enough space for important equipment, while a large material box has been specially designed for the safe transport of a mobile fire alarm system.

The eye-catching design of the SafeCaddy® ensures easy recognition as a rescue tool and underlines the importance of preventive fire protection. Equipped with a comfortable, rubber-coated push handle, our product allows you to operate it easily and ergonomically by one person.

Another decisive advantage of the SafeCaddy® lies in its puncture-proof wide wheels made of polyurethane (PU), which are mounted on roller bearings. These wheels do not lock even after prolonged standing time and are always ready for use. For maximum stability and pressure relief of the wheels, the SafeCaddy® has four robust support feet.

Our SafeCaddy® has been manufactured from anodised aluminium to provide the optimum transport solution. We understand the importance of durability and functionality in a product that is essential for your fire protection. With a 30x30 mm profile, the SafeCaddy® is strong yet lightweight, making it easy to transport and handle.

The SafeCaddy® "Mobile fire alarm system" is supplied to you including an aluminium box that you can equip individually. This gives you the opportunity to adapt the unit to your specific requirements and get the maximum benefit from it. Flexibility and adaptability are the key to making the most of our safety solution.

## Scope of supply

- SafeCaddy® trolley: 1 x
- Case with lid: 1 x

## Information on sustainability criteria

- Corporate certification: ISO 9001
- Corporate certification: ISO 14001
- Corporate certification: EN 1090
- Corporate certification: EcoVadis
- RoHS
- REACH
- The MUNK Group complies with a Code of Conduct
- The Supply Chain Act does not apply due to our size
- The materials used are listed in the technical specification
- Resource-saving production: own photovoltaic systems
- Energy-efficient consumption during production: LED lighting
- Repairability, durability and quality: 15-year warranty on series products made in Germany
- Recyclability: Our products are mostly made of aluminium, steel or wood and can be fed directly into the recycling process.
- Socially acceptable working conditions in production: fair wages, gender equality
