- 4 support feet for stable stand and pressure relief of the wheels

- Integrated lashing points for safe transport

- Simple and ergonomic operation by one person

- Fabric reinforced cover as accessory

preventive fire protection. With its high-quality equipment and outstanding performance, the SafeCaddy® is an innovative component of any safety concept.

The specifications speak for themselves: equipped with puncture-proof and wide wheels made of polyurethane (PU) as well as a roller bearing construction, the SafeCaddy® is always ready for use, even after a long period of standing. These robust wheels allow you to transport it effortlessly on different surfaces and guarantee reliable mobility in any situation.

The SafeCaddy® also offers you optimum organisation of your equipment. A large mesh basket gives you direct access to all important tools, while the spacious material box has been specially designed for the safe transport of a mobile fire alarm system. The supplied aluminium box allows individual equipment and adaptation to your specific requirements.

As a leading supplier of rescue technology, we know that your safety needs are unique. That's why we supply the SafeCaddy® "Mobile Fire Alarm System" complete with high-quality products that optimise your fire protection. From optical-acoustic alarm receivers to radio smoke detectors and radio push-button detectors to fire extinguishers - everything you need to be best prepared is included.

The SafeCaddy® has been developed not only with functionality in mind, but also with eye-catching design for easy recognition as a rescue tool. In emergency situations, every second counts, and with the SafeCaddy® you can ensure that your safety equipment is immediately at hand. The robust anodised aluminium provides a durable and stable transport solution that protects your investment.

Our goal is to provide you with the highest level of user-friendliness. The SafeCaddy® has a comfortable, rubber-coated push handle and can
